

Appointment Breakdown

Caregiver training to increase socialization, communication, and play

1. Intake and Assessment

During this appointment, student therapists will participate in child-led play. At this time, they will be conducting observations and a series of assessments. The parents will be asked additional questions about their child's communication. These assessments will help the student therapists create individualized goals for your child to target in future appointments.

2 hours
\$125

2. Implementation and Coaching

Over the course of 5 to 7 appointments, the student therapists will review current goals that they have for your child based off of the observations and assessments. They will provide models of different behaviors that the parents can use when trying to reach their child's communication goals while playing with their child. The parents will be trained and provided their own opportunities to practice the targeted behaviors. Also, parents will answer questions on child's progress or any questions they have.

1-1.5 hours
\$50/appointment
